## Aspiring Engineers

During Ms. McGinnis' second grade STEAM class at Charles Olbon School, students self-selected groups and used the engineering design process to create prototypes of robots that will help keep the environment clean. The students planned, built, tested, improved, and even named their unique robots.

What an impressive group of future engineers we have!

# Showing Our Support

Both the Memorial Middle School and Beatrice Gilmore School communities came together on May 1 for the annual Autism Walk. While lively music played, the students did two complete laps around the field complex to show their support and solidarity.

## Words Of Appreciation

Beatrice Gilmore School's "Kindness Ninja" Tayeeba received a letter from Senator Kristin Corrado in recognition of her Kindness Ninja acts. Tayeeba, a 4th grader in Ms. Facciollio's class, completed 26 Kindness journals during the 15 Days of Kindness Challenge, which totals 260 acts of kindness!

# Working To Make The World A Better Place

Seven third grade students took the initiative to create an Earth Day Challenge. They created the idea, fliers, posters and did morning PA announcements. Several students participated over Spring Break doing such acts as planting trees with their grandparent, collecting trash from the neighborhood with their mom and lots of recycling and reusing. Winners were selected and were awarded a prize from Pomptonian Food Services.

## **Memorial's Animal Club members visit The Seeing Eye in Morristown**

The Memorial School Animal Club recently visited The Seeing Eye in Morristown. The students learned all of the phases of the training program which the Seeing Eye Dog goes through from birth to graduation. They also learned what life is like in a typical day of a blind person and their dog.

The cost of the entire program from birth to being teamed up with their human partner is \$65,000 for one dog, however the person receiving the dog pays only \$150 the first time. There is a reduced cost for any dogs which may follow after that, and veterans pay \$1. During the lifetime of a blind person, they may need up to seven or eight dogs.

The students then took a tour of the facility where the dogs are trained. No one is permitted to visit the compound in Chester, where the puppies are actually born and kept under a watchful eye until it's time to go to their puppy-raising family. The Seeing Eye, Inc. was founded in 1929. It is the oldest, and one of the largest, of all the guide dog schools in the U.S. To learn more go to [www.seeingeye.org](http://www.seeingeye.org).
